WARNINGS Read Before Using Your Sega Dreamcast Video Game System

CAUTION

Anyone who uses the Sega Dreamcast should read the operating manual for the software and console before operating them. A responsible adult should read these manuals together with any minors who will use the Sega Dreamcast before the minor uses it.

HEALTH AND EPILEPSY WARNING

Some small number of people are susceptible to epileptic seizures or loss of consciousness when exposed to certain flashing lights or light patterns that they encounter in everyday life, such as those in certain television images or video games. These seizures or loss of consciousness may occur even if the person has never had an epileptic seizure.

If you or anyone in your family has ever had symptoms related to epilepsy when exposed to flashing lights, consult your doctor prior to using Sega Dreamcast.

In all cases, parents should monitor the use of video games by their children. If any player experiences dizziness, blurred vision, eye or muscle twitches, loss of consciousness, disorientation, any involuntary movement or convulsion, IMMEDIATELY DISCONTINUE USE AND CONSULT YOUR DOCTOR BEFORE RESUMING PLAY.

To reduce the possibility of such symptoms, the operator must follow these safety precautions at all times when using Sega Dreamcast:

- Sit a minimum of 6.5 feet away from the television screen. This should be as far as the length of the controller cable.
- Do not play if you are tired or have not had much sleep.
- Make sure that the room in which you are playing has all the lights on and is well lit.
- Stop playing video games for at least ten to twenty minutes per hour. This will rest your eyes, neck, arms and fingers so that you can continue comfortably playing the game in the future.

OPERATING PRECAUTIONS

To prevent personal injury, property damage or malfunction:

- Before removing disc, be sure it has stopped spinning.
- The Sega Dreamcast GD-ROM disc is intended for use exclusively on the Sega Dreamcast video game system. Do not use this disc in anything other than a Sega Dreamcast console, especially not in a CD player.
- Do not allow fingerprints or dirt on either side of the disc.
- Avoid bending the disc. Do not touch, smudge or scratch its surface.
- Do not modify or enlarge the center hole of the disc or use a disc that is cracked, modified or repaired with adhesive tape.
- Do not write on or apply anything to either side of the disc.
- Store the disc in its original case and do not expose it to high temperature and humidity.
- Do not leave the disc in direct sunlight or near a radiator or other source of heat.
- Use lens cleaner and a soft dry cloth to clean disc, wiping gently from the center to the edge. Never use chemicals such as benzene and paint thinner to clean disc.

PROJECTION TELEVISION WARNING

Still pictures or images may cause permanent picture tube damage or mark the phosphor of the CRT. Avoid repeated or extended use of video games on large-screen projection televisions.

BACKGROUND STORY

TOKION: YEAR 1218

In the undeveloped jungle, dome shaped ancient ruins were discovered. The area was hard to access because of the dense forest. For this reason, research of the ruins did not begin until 100 years after they were found.

TOKION: YEAR 1353

When excavation of the ancient ruin began, a mysterious machine was unearthed there. In the cockpit, a man was found sleeping. After the research, scientists discovered that the ruin was over 5000 years old. The scientists analyzed the structure of the strange machine. They could not find anything. The machine appeared to have no power source. It looked spiritual. People started calling it "Elemental Gimmick Gear." Through developments in science and technology, the EGG was continuously analyzed over a long period of time. Copies of the EGG were produced and used as vehicles.

Meanwhile, the man found in the EGG's cockpit continued to sleep, no matter how hard the scientists tried to wake him. He was named "The Sleeper". He did not age.

TOKION: YEAR 1453

The ruin suddenly became active as if it had a life. It violently extended many tentacles and tore the ground.

People ran helplessly. The tentacles destroyed buildings, streets and rich forests. It looked like they were sucking life. They never stopped breeding. They kept growing and expanding.

The ruin breathed out and a thick fog surrounded it. Then people naturally called the place "Fogna". Researchers, even pirates, tried not to step in that area because of fear.

The man found in the cockpit suddenly awoke at the same time as the ruin's breeding started. He had no memory of his past. He did not even remember his own name.

A scientist, Ms. Selen, who was with the man when he awoke released Sleeper without saying anything to the other scientists. Selen sent him to Fogna to begin searching for clues of what happened so long ago, and to stop the breeding.
